

Frio River Watershed

Brush Control Planning, Assessment, and Feasibility Study

Prepared for:

**Texas State Soil and
Water Conservation Board**

Prepared by:

In association with:

Texas A&M University

December 2000

Signature Sheet

Adrian J. Huckabee, P.E.
Project Manager
HDR Engineering, Inc.*

Samuel K. Vaugh, P.E.
Project Engineer (Hydrology)
HDR Engineering, Inc.*

*Note: Section 6 and 7, and Appendices A and B were prepared as part of the TSSWCB contract with Texas A&M University Agricultural Extension Service and not as part of the HDR Engineering, Inc. contract except to the extent of final editing, formatting, and report copying. The professional engineers shown above did not supervise the work of sections prepared by Texas A&M University and were not contractually responsible for those sections except to the extent stated above.

Table of Contents

<u>Section</u>	<u>Page</u>	
1	Introduction	1-1
2	Executive Summary	2-1
3	Description of the Watershed	3-1
	3.1 Area Comprising the Frio River Watershed.....	3-1
	3.2 Climate	3-1
	3.3 Physiography	3-1
	3.4 Geology	3-4
	3.5 Water Resources.....	3-6
	3.5.1 Surface Water	3-7
	3.5.2 Groundwater	3-9
	3.6 Resource Aspects	3-9
	3.7 Vegetation	3-11
4	Historical Considerations.....	4-1
	4.1 Paleo-Indian.....	4-2
	4.2 Spanish Influence	4-3
	4.3 Rangeland History of the Watershed.....	4-8
	4.3.1 1840 to 1900	4-9
	4.3.2 1901 to 1939	4-11
	4.4 Summary	4-12
5	Hydrologic Evaluation.....	5-1
	5.1 Hydrologic Description of Basin.....	5-1
	5.1.1 Hydrologic History and Conditions	5-1
	5.1.2 Precipitation and Naturalized Streamflow Development	5-2
	5.1.3 Analysis Methods	5-10
	5.2 Trends in Rainfall and Streamflow Characteristics.....	5-10
	5.3 Potential Sites for Brush Control	5-19
	5.4 Summary	5-20

Table of Contents (Continued)

<u>Section</u>	<u>Page</u>	
6	Hydrologic Simulation.....	6-1
6.1	Methods.....	6-1
6.1.1	Watershed Characteristics.....	6-1
6.1.2	Climate.....	6-1
6.1.3	Topography.....	6-1
6.1.4	Soils.....	6-3
6.1.5	Land Use/Land Cover.....	6-4
6.1.6	Model Input Variables.....	6-4
6.2	Frio River Watershed Results.....	6-6
6.2.1	Calibration.....	6-6
6.2.2	Brush Removal Simulation.....	6-7
7	Economic Analysis.....	7-1
7.1	Introduction.....	7-1
7.2	Brush Control Costs.....	7-1
7.3	Landowner and State Cost Shares.....	7-6
7.4	Cost of Additional Water.....	7-11
 <u>Appendices</u>		
Appendix A	Brush/Water Yield Feasibility Studies.....	A-1
Appendix B	Assessing The Economic Feasibility of Brush Control to Enhance Off-Site Water Yield.....	B-1

List of Figures

<u>Figure</u>		<u>Page</u>
3-1	Location Map	3-2
3-2	Vegetation	3-3
3-3	Aquifers	3-10
3-4	Soils.....	3-12
4-1	Governor Domingo Teran de los Rios’s 1691 – 1692 Expedition.....	4-5
4-2	Aguayo’s Expedition 1721.....	4-7
4-3	Natural Regions.....	4-14
5-1	USGS Streamgages	5-4
5-2	Rainfall Time Series for Frio River Watershed.....	5-11
5-3	Runoff as a Percentage of Rainfall Time Series for Frio River Watershed.....	5-13
5-4	Results of Statistical Analyses of Rainfall	5-16
5-5	Results of Statistical Analyses of Runoff as a Percentage of Rainfall	5-18
6-1	Frio River Watershed Sub-basin Map.....	6-2
6-2	Climate Stations in the Frio Watershed.....	6-2
6-3	Frio River Watershed Roads Map.....	6-3
6-4	Area of Heavy and Moderate Brush in the Frio River Watershed	6-4
6-5	Simulated and Measured Cumulative Flow at the Outlet of the Frio.....	6-6
6-6	Simulated Cumulative Flow at the Outlet for Brush and No Brush Conditions in the Frio.....	6-8
6-7	Increased Water Yield (Gallons) by Sub-Basin	6-8

List of Tables

<u>Table</u>		<u>Page</u>
2-1	Summary of Streamflow Gages Used in this Study	2-3
3-1	Climate of Frio River Watershed Counties	3-4
3-2	Water Quality Concerns by Stream Segment	3-8
5-1	Frio River Watershed — Flood History Summary.....	5-3
5-2	Summary of Streamflow Gages Used in this Study	5-5
5-3	Annual Areal Precipitation for Watershed Above Gage	5-6
5-4	Annual Naturalized Streamflow for Watershed	5-8
5-5	Comparison of Average Annual Rainfall and Runoff per Unit Rainfall....	5-12
5-6	Indication of Statistically Significant Trend in Rainfall in the Frio River Watershed — 90% Confidence Level.....	5-15
5-7	Indication of Statistically Significant Trend in Runoff/Rainfall in Frio River Watershed — 90% Confidence Level.....	5-17
6-1	SWAT Input Variables for Frio River Watershed.....	6-5
6-2	Frio Areas and Water Yield.....	6-9
7-1	Cost of Water Yield Brush Control Programs by Type-Density Category (Northern Portion of Frio River Watershed)	7-2
7-2	Cost of Water Yield Brush Control Programs by Type-Density Category (Southern Portion of Frio River Watershed)	7-4
7-3	Grazing Capacity With and Without Brush Control (Acres/AUY) (Northern Portion of Frio River Watershed)	7-7
7-4	Grazing Capacity With and Without Brush Control (Acres/AUY) (Southern Portion of Frio River Watershed)	7-7
7-5	Investment Analysis Budget, Cow-Calf Production	7-9
7-6	Landowner / State Cost-Shares of Brush Control (Northern Portion of Frio River Watershed)	7-10

List of Tables (Continued)

<u>Section</u>		<u>Page</u>
7-7	Landowner / State Cost-Shares of Brush Control (Southern Portion of Frio River Watershed).....	7-11
7-8	Cost of Added Water from Brush Control by Sub-Basin (Acre-Foot).....	7-13
